SUPPLEMENTAL REISSUE DECLARATION UNDER 37 C.F.R. § 1.175

Dear Sir:

I hereby declare the following:

1. I am the first and original inventor of the subject matter which is described and claimed in U.S. Patent 6,263,879, a copy of which is attached to this declaration.
2. I have reviewed and understand the entire contents of U.S. Reissue Patent Application 10/626,486, which was filed 24 July 2003.
3. I have reviewed and understand the contents of the Preliminary Amendment filed with U.S. Reissue Patent Application 10/626,486 on 24 July 2003 (referred to herein as "the Preliminary Amendment"). I am the first and original inventor of the subject matter recited in the amended claims presented in the Preliminary Amendment, including new Claims 14 through 23.

Reexamination Control Number **90/006,090**
Reissue Application Number **10/626,486**

4. I acknowledge the duty to disclose information which is material to patentability as defined in 37 C.F.R. § 1.56.
5. I believe the original patent to be partly inoperative or invalid by reason of patentee claiming less than patentee had a right to claim in the patent.
6. Independent Claim 1 of U.S. Patent 6,263,879 recites, among other things, "selecting a beam spot controller mechanism for reducing and focusing said selected ablative laser's output beam onto a predetermined spot size on the surface of the cornea". Recitation of this element renders the original patent partly inoperative or invalid or defective because this element is optional. This element has been omitted from new independent Claim 14 added in the Preliminary Amendment.
7. All errors which are being corrected in this reissue application arose without any deceptive intention on my part.
